

SUBARU

Confidence in Motion

SUBARU **CROSSTREK**

MEET THE NEW SUBARU CROSSTREK.

Embark on a journey in the new Subaru Crosstrek where every road leads to excitement and every path is an adventure.

Powered by Subaru's robust 2.0L e-BOXER petrol engine, this hybrid SUV is not just a mode of transportation; it's a companion that can handle any terrain, conquer any weather, and turn every drive into a captivating experience.

With permanent Symmetrical All-Wheel Drive with X-MODE you can take on any journey with confidence, knowing that your Crosstrek is engineered to handle the elements and keep you in control at all times.

Built on the Subaru Global Platform, Crosstrek enjoys Subaru's latest and most advanced safety technology, ensuring you have peace of mind on every journey. From Adaptive Cruise Control to Pre-Collision Braking, the Crosstrek is your reliable partner in navigating the unexpected.

New Crosstrek. Join the journey, and let the adventure begin.

Models shown may not reflect UK specification.
E & O.E.

WHERE PERFORMANCE MEETS TRUST, EVERY STEP OF THE WAY.

With the new Crosstrek, your sense of adventure knows no bounds. Whether you're navigating city streets or conquering country roads, the Crosstrek is your key to unlocking a world of excitement and exploration. Equipped with permanent Symmetrical All-Wheel Drive, improved X-MODE and impressive high ground clearance as standard, you can enjoy a smooth and controlled ride in all conditions.

DUAL FUNCTION X-MODE WITH HILL DESCENT CONTROL

Steep, wet or slippery terrain is no match for Crosstrek. Newly evolved X-MODE provides reliable control. Using the 11.6" touchscreen, switch between [SNOW/DIRT] mode to confidently negotiate snow, dirt, or gravel, or [D.SNOW/MUD] mode for soft conditions where lesser vehicles get stuck. When X-MODE is activated, Hill Descent Control automatically maintains a constant speed when travelling downhill: all you have to do is steer.

SI-DRIVE

At the press of a button, Subaru Intelligent Drive (SI-DRIVE) lets you adjust the throttle and gear-shifting response to give you immediate power and agility on demand. Select Sport Mode for instant throttle response, ideal for enjoying winding roads, or Intelligent Mode for more fuel-efficient power delivery around town or on long journeys.

CLEARANCE BY DESIGN

Crosstrek is engineered to drive on or off-road and overcome tough terrain. The high 220mm ground clearance maximises approach, departure and ramp angles, minimising the risk of the bumpers or chassis getting damaged or stuck.

ADVENTURE AWAITS. SPACE GUARANTEED.

Load up, buckle in, and set off on your family adventures with ease. The Crosstrek is designed to accommodate your active lifestyle, making it effortless to pack up all your family's gear and hit the road, turning every outing into a memorable experience.

BOOT SPACE

Whether it's outdoor sports, hobbies, or spontaneous weekend getaways, the Crosstrek ensures you never have to leave anything behind. With generous storage capacity, you can easily pack all your equipment and baggage, allowing you to fully embrace the spirit of adventure.

60 / 40-SPLIT FOLDING REAR SEATS

The wider opening and 60 / 40-split folding rear seats make loading and unloading large items even more convenient.

REAR GATE TRIM / SIDE SILL PLATE

The rear gate trim and rear door side sill plates feature a non-slip, scratch-resistant texture with a mountain range motif design that connect seamlessly to create a harmonious and playful atmosphere that's also functional. Plus, the expanded side sill plates provide convenient access to the integrated roof rails for anyone.

Models shown may not reflect UK specification.
E & O.E.

**ADVANCED, SPACIOUS,
AND COMFORTABLE.**

With a completely re-imagined cabin interior, new Crosstrek has been carefully crafted to ensure you and your family travel in first-class comfort, making every journey an experience to remember. Long journeys are no longer a test of endurance. The quiet, smooth, and comfortable ride of the Crosstrek ensures that everyone arrives at their destination refreshed and ready to seize the day.

POWER-SLIDING, TILT-ADJUSTABLE SUNROOF*

In fine weather, it's easy to connect with the great outdoors. The inner-sliding sunroof quickly opens to allow daylight to flood into the cabin in seconds.

REAR SEAT CENTRE ARMREST

The interior of the Crosstrek offers comfort for all passengers, with cup holders in the rear seat centre armrest.

FRONT USB PORTS (TYPE-A AND C)

Subaru's USB ports not only connect your phone to the audio system but also keep it charged, ensuring your device stays powered up for the entire journey.

STAY CONNECTED, STAY IN CONTROL.

Discover a new level of connectivity and control inside the new Crosstrek with a completely redesigned next-generation infotainment system. Touch, swipe or drag to navigate the large, intuitive 11.6" infotainment touchscreen, or simply use your voice. Bring up maps*¹, find contacts, send messages, select driving modes, and access compatible apps, news, music, podcasts and more.

11.6" FULL HD VERTICAL DISPLAY

Enjoy intuitive, smartphone-like operation for audio and other useful functions with the large 11.6" touchscreen display.

APPLE CARPLAY™ AND ANDROID AUTO™*²

Apple CarPlay™ and Android Auto™ mirror compatible apps from your smartphone onto Crosstrek's touchscreen, allowing you to make phone calls and dictate text messages hands-free, reducing distractions when you're on the road.*³

INSTRUMENT PANEL

The full-colour LCD meter display helps you understand useful driving information at a glance so you can keep your eyes on the road.

REVERSING CAMERA

When you engage reverse gear, the reversing camera displays a live colour image along with guidelines to assist in parking manoeuvres.

VOICE COMMAND*⁴

Send and access smartphone text messages, play music, make phone calls and even control the air conditioning.

*¹Compatible Apple™ or Android™ device with GPS navigation app required.

*²Driver is responsible for safe driving. Please refrain from operating touchscreen whilst driving. Models shown may not reflect UK specification. E & O.E.

*³This functionality uses your smartphone's data.

*⁴Requires compatible Bluetooth enabled phone to be paired with the infotainment system.

SUBARU CORE TECHNOLOGY.

Subaru’s core technologies define what makes a Subaru a Subaru – and the unique driving experience that only our vehicles can provide. These core systems enable Subaru vehicles to live up to the brand’s exceptional standards of performance, comfort, safety, and reliability. They also underpin Subaru’s promise to deliver both driving enjoyment and peace of mind to every passenger.

01 BOXER & E-BOXER ENGINE

The horizontally-opposed configuration of the Subaru Boxer engine places pistons 180 degrees apart for a lower, flatter profile than other engine types. One of the main benefits of this configuration is that the pistons’ movements naturally counteract each other, helping to reduce vibration and noise, delivering a smoother driving experience. The engine’s shape and unique piston movement allow it to be installed lower down and further back than a conventional engine, giving the whole car a low centre of gravity and balanced weight distribution for exceptional handling and poise.

For efficient driving, the Subaru e-BOXER system adjusts the power-split ratio between the 2.0-litre direct-injection engine and the electric motor to match the driving conditions. When paired with Lineartronic, the result is quiet, smooth, powerful performance – and a rewarding drive.

03 LINEARTRONIC AND ACTIVE TORQUE SPLIT AWD

Subaru Lineartronic is a Continuously Variable Transmission that moves between a span of gear ratios to provide smooth acceleration while keeping the engine at its optimal rev range. Lineartronic works particularly well with Symmetrical AWD as it preserves momentum that is often lost during gear changes on a manual or traditional automatic transmission. When the clutch pedal is depressed on a manual or the lock up clutch is released on a normal automatic, you break power to the wheels causing them to slow and lose performance.

A PERFECTLY BALANCED CONFIGURATION

The design, shape and position of the Boxer engine results in the car having a very balanced weight distribution. This contributes to the car’s excellent handling and offers increased stability compared to V or transverse engine types.

The Boxer engine, with its unique configuration, sits low in the chassis and is located further back allowing engine weight to be more evenly distributed over all four wheels.

02 SYMMETRICAL AWD

Subaru’s permanent Symmetrical All-Wheel Drive (AWD) maximises handling and enhances control on all roads in almost any conditions. Unlike any other AWD configuration, the engine, transmission and propshaft are positioned in a symmetrical straight-line layout which provides a direct route for traction and delivers maximum power transfer to all four wheels at all times.

The driveshafts are similar lengths, reducing torque steer and eliminating the need for additional controls or weights to be added as the symmetrical design is inherently stable, producing natural balance and performance for a safer ride.

In contrast, Lineartronic helps to maintain traction by continuously providing power to the wheels at all times. Lineartronic is paired with Active Torque Split AWD which controls torque distribution between the front and back wheels. Normal torque split is set to 60% at the front and 40% to the rear. However, sensors constantly monitor changes in grip, vehicle speed and stability of the car and will in real time adjust the torque to each wheel, maintaining optimum grip, if more demanding conditions are identified.

04 SUBARU GLOBAL PLATFORM

Subaru Global Platform (SGP) underpins the next generation of Subaru vehicles. Enhancing all-around safety and performance, it offers a driving experience you can only find in a Subaru. New Crosstrek now joins the Forester and Outback on the SGP to deliver even more enjoyment and peace of mind to all drivers and passengers.

1. IMPROVED SAFETY PERFORMANCE

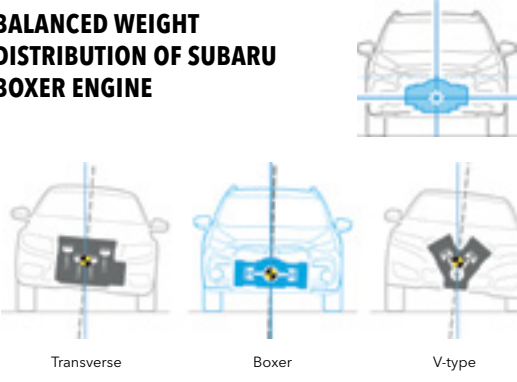

Body strength is increased by 40%. In the event of a collision, the frame can absorb and safely dissipate more energy. The new frame design also improves energy dispersal, directing more energy safely beneath the seating compartment.

2. BETTER STABILITY AND HANDLING

By increasing rigidity of the body, front suspension and rear subframe, Crosstrek has enhanced straight-line stability and minimal body roll. More responsive handling allows the driver to better steer the car as intended and improves hazard avoidance.

3. ENHANCED RIDE QUALITY

Vibrations and noise are minimised to improve passenger comfort. Suspension improvements and a highly rigid chassis prevent vibrations and resonance between the body and parts such as the steering wheel, seats and suspension to provide a quiet, comfortable journey for all.

SUBARU ALL-ROUND SAFETY.

When your car gives you peace of mind, life becomes more enjoyable. That's why at Subaru, safety comes first. Subaru Corporation has announced its vision to eliminate traffic accident deaths involving Subaru vehicles by 2030. This commitment can be seen in Subaru's advanced collision avoidance systems, and unique technologies such as Subaru's Global Platform and Symmetrical All-Wheel Drive (AWD). We continuously strive to improve the all-around safety of our vehicles to build a future that is accident-free. Our vision of 'Safety First' is built around four pillars of protection:

PRIMARY

Primary Safety begins at the underlying design stage. It includes blind spot minimisation, optimum driving position, an adjustable driver's seat and an intuitive interface designed to reduce distractions.

ACTIVE

Active Safety refines all the basic functions of a car – driving, turning and stopping – to allow precise control. Examples include Subaru's Symmetrical AWD, Hill-start Assist, Vehicle Dynamics Control and Electric Brake-force Distribution.

PASSIVE

Passive Safety aims to protect passengers in the event of a collision, with features like the Ring-Shaped Reinforcement Framed body or the cabin-protecting engine layout.

PREVENTIVE

Preventative Safety is about helping to avoid collisions before they happen. Our advanced safety technologies include EyeSight^{*1}, Subaru Rear Vehicle Detection, Side View Monitor, High Beam Assist, Steering Responsive Headlights and an Emergency Stop Signal.

01. PASSIVE
RING-SHAPED REINFORCEMENT FRAME

The Ring-shaped Reinforcement Frame makes better use of high-tensile steel panels and has been structurally redesigned for more efficient energy absorption from impacts in all directions.

02. PASSIVE
CABIN-PROTECTING LAYOUT

In the event of a collision, the low-mounted engine and gearbox are designed to both absorb the impact and drop safely below the passenger compartment, protecting occupants' legs. To allow for this movement, the cradle securing the engine is engineered to collapse, allowing the engine to slide downwards.

03. PASSIVE
SRS AIRBAGS^{2}**

Front SRS airbags, front side SRS airbags, curtain SRS airbags, knee SRS airbag, front seat centre SRS airbag and a passenger seat cushion airbag are standard on Crosstrek to give all passengers a higher level of protection in the event of a collision.

04. PRIMARY
VISIBILITY

Optimal driving position, window heights, and carefully arranged pillars provide excellent visibility in all directions to reduce blind spots, letting you easily check your surroundings.

05. PREVENTATIVE
SUBARU REAR VEHICLE DETECTION^{3}**

Subaru Rear Vehicle Detection (SRVD) includes Blind Spot Monitoring, Lane Change Assist & Rear Cross Traffic Alert. Sensors placed at the rear of the vehicle alert you to vehicles in your blind spots for safer lane changes and can also warn you of potential collision danger when reversing out of a parking space.

09. ACTIVE
VEHICLE DYNAMICS CONTROL SYSTEM AND ACTIVE TORQUE VECTORING

If the vehicle approaches the limits of stability while cornering or avoiding an obstacle, Vehicle Dynamics Control (VDC) sensors adjust the All-Wheel Drive torque distribution, engine output and brakes at each wheel to help keep the vehicle on course. When cornering, Active Torque Vectoring also applies the brakes, delivering less torque to the inside wheels and more torque to the outside wheels, enhancing handling.

10. ACTIVE
AUTO VEHICLE HOLD

When the vehicle is at a complete stop, Auto Vehicle Hold keeps the vehicle in place even when the brake pedal is released, which is especially useful in stop-start traffic.

06. PREVENTATIVE
LED STEERING RESPONSIVE HEADLIGHTS

Powered by LEDs, these bi-functional headlights combine low and high beams and are steering-responsive, ensuring good visibility around corners at night.

11. ACTIVE
HAZARD AVOIDANCE

The lower centre of gravity design, enhanced suspension system and rigidity improvements ensure the Crosstrek responds immediately when evasive actions are taken, helping you to avoid hazards on the road.

^{*1}EyeSight is a driving support system which may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving and observance of traffic regulations. See Owner's Manual for complete details on system operation and limitations for EyeSight, including functions in this brochure.
^{**2}SRS: Supplemental Restraint System. Must be used with seatbelts.
^{**3}The driver is always responsible for safe and attentive driving and observance of traffic regulations. Please do not depend solely on Subaru Rear Vehicle Detection, High Beam Assist or Reverse Automatic Braking for safe driving. There are limitations to the recognition features of these systems. See Owner's Manual for complete details on system operation and limitations. Models shown may not reflect UK specification. E & O.E.

SUBARU EYESIGHT DRIVER ASSIST TECHNOLOGY.

At Subaru, we believe in all-around safety. An important part of that is pre-collision safety: making every effort to ensure an accident never happens. That's why we created EyeSight*, Subaru's cutting-edge driving support system. Like a second pair of eyes for the road ahead, EyeSight uses two stereo cameras capturing three-dimensional colour images with excellent image recognition, nearly as capable as the human eye. More accurate than traditional camera and sensor technologies, EyeSight uses images from both

cameras to precisely determine shape, speed and distance, meaning it not only detects vehicles but also motorbikes, bicycles and pedestrians. When a potential hazard is identified, it warns the driver and even applies the brakes if necessary, to help avoid an accident. With excellent safety performance, EyeSight gives the driver ultimate peace of mind. Completely re-engineered with a host of new and advanced functions, the latest EyeSight features introduced for new Crosstrek include:

For illustration purposes only. Not actual measurements.

01. ADAPTIVE CRUISE CONTROL

Adaptive Cruise Control allows the driver to set vehicle speed and distance to the car in front. It constantly monitors distance and speed then adjusts the engine, transmission and brakes accordingly to maintain speed in line with the traffic flow. Designed for use on motorways and similar roads, Adaptive Cruise Control improves driver comfort and convenience on long drives.

03. LANE CENTERING FUNCTION

When Adaptive Cruise Control is in use and registering lane markers or a preceding vehicle, Lane Centering holds a driving position near the centre of the lane or assists with steering to keep following the vehicle in front.

05. LEAD VEHICLE START ALERT

It's easy to become distracted when waiting in stationary traffic. EyeSight will prompt the driver to notice that vehicles in front have started moving again with a buzzer and a flashing indicator.

07. PRE-COLLISION THROTTLE MANAGEMENT

If the car is parked facing an obstacle, EyeSight will give the driver a visual and audible warning if they accidentally select drive instead of reverse. The system will also cut engine output to help avoid a frontal collision.

09. TRAFFIC SIGN RECOGNITION AND INTELLIGENT SPEED LIMITER

Automatically recognising speed limit signs, Traffic Sign Recognition displays the applicable limit on the multi-information display, helping to prevent unintended speeding violations. In tandem with Traffic Sign Recognition, Intelligent Speed Limiter automatically restricts vehicle speed to reflect the currently detected limit.

*EyeSight is a driving support system which may not operate optimally under all driving conditions or for all objects. The driver is always responsible for safe and attentive driving and observance of traffic regulations. See Owner's Manual for complete details on system operation and limitations for EyeSight including functions in this brochure. Models shown may not reflect UK specification. E & O.E.

02. EMERGENCY LANE KEEP ASSIST

A stereo camera and rear corner radars monitor oncoming vehicles. If you try to change lanes without noticing that a vehicle in the adjacent lane is approaching, the system sounds a visual and audible alert and will offer gentle steering control.

04. LANE SWAY AND DEPARTURE WARNING

Lane Sway and Departure Warning will alert the driver with a visual and audible warning if the vehicle sways or departs its lane without indicating.

06. PRE-COLLISION BRAKING SYSTEM

The Pre-Collision Braking System activates visual and audible warnings to alert the driver of a potential collision. If the driver fails to take evasive action, the brakes will be applied automatically to either prevent an accident entirely or reduce the severity of an impact depending on speed. If the driver brakes but does not apply enough pressure, the system will increase braking force.

08. AUTONOMOUS EMERGENCY STEERING

Autonomous Emergency Steering helps avoid a collision with a vehicle, pedestrian or bicycle when Pre-Collision Braking alone may not be sufficient by controlling the steering.

SUBARU ADVANCED TECHNOLOGIES: DRIVER MONITORING SYSTEM.

The Driver Monitoring System supports safer driving by providing a warning if a driver appears to show signs of fatigue or that the driver is not focused on the road ahead. The cabin camera is clever enough to recognise up to five pre-registered drivers, automatically re-instating customised settings for a personalised experience.

ALERT*

The Subaru Driver Monitoring System constantly monitors the driver's gaze and blink pattern. If the gaze should wander or the eyes close (for example, due to a distraction or tiredness), audio and visual warnings on the meter and the 11.6" display of the instrument panel attract the driver's attention, restoring concentration.

SEAT POSITION AUTO-ADJUSTMENT

The system recognises up to five drivers, automatically adjusting the seat to their preferred position.

DOOR MIRROR POSITION AUTO-ADJUSTMENT

The system conveniently adjusts external mirrors to the driver's pre-registered setting.

AUTO MULTI-INFORMATION DISPLAY AND INSTRUMENT PANEL

A driver's last multi-information display settings, including individual fuel consumption information, are restored automatically. The meter display settings switch automatically and are shown on the 11.6" multi-information display.

AUTO AIR CONDITIONING

The system remembers and restores each driver's last used climate control settings to help provide a comfortable and pleasant cabin environment.

*The driver is always responsible for safe and attentive driving and observance of traffic regulations. Please do not depend solely on the Driver Monitoring System features for safe driving. There are limitations to the recognition features of this system. See Owner's Manual for complete details on system operation and limitations.

01. STEERING RESPONSIVE HEADLIGHTS

Powered by LEDs, these bi-functional headlights combine low and high beams and are steering-responsive, ensuring good visibility around corners at night. An Adaptive Driving Beam also shapes your high beams around objects to provide optimal night time visibility, without dazzling oncoming drivers.

02. 18" DIAMOND TURNED ALUMINIUM-ALLOY WHEELS*

With a rugged appearance, aerodynamic design and high-quality finish, distinctive alloy wheels make the Crosstrek stand out.

03. FRONT LED FOG LIGHTS

Offering enhanced visibility and improved safety during night time driving, stylish LED fog lights complement the powerful look of the front face.

04. LED REAR COMBINATION LIGHTS

The rear combination, C-shaped lights give Crosstrek a distinctive look.

05. RAISED ROOF RAILS

Roof rails on the Crosstrek make light work of carrying bulk loads.

*Available on Touring models only.
E & O.E.

06. ILLUMINATED USB PORTS (FRONT AND REAR)

Keep all your electronic devices fully charged with easily-accessed USB power ports for both front and rear passengers.

07. KEYLESS ENTRY WITH PUSH-BUTTON START SYSTEM

With the key fob in your possession, you can unlock the front doors or boot by just gripping the handle and starting the engine with the push of a button.

08. DUAL-ZONE AIR CONDITIONING SYSTEM

The stylish smart cabin stays chilled with an improved, voice-operated dual-zone air conditioning system, with humidity sensors to gauge temperature, comfort and monitor efficiency.

09. 10-WAY POWER ADJUSTABLE DRIVER'S SEAT (WITH LUMBAR SUPPORT)*

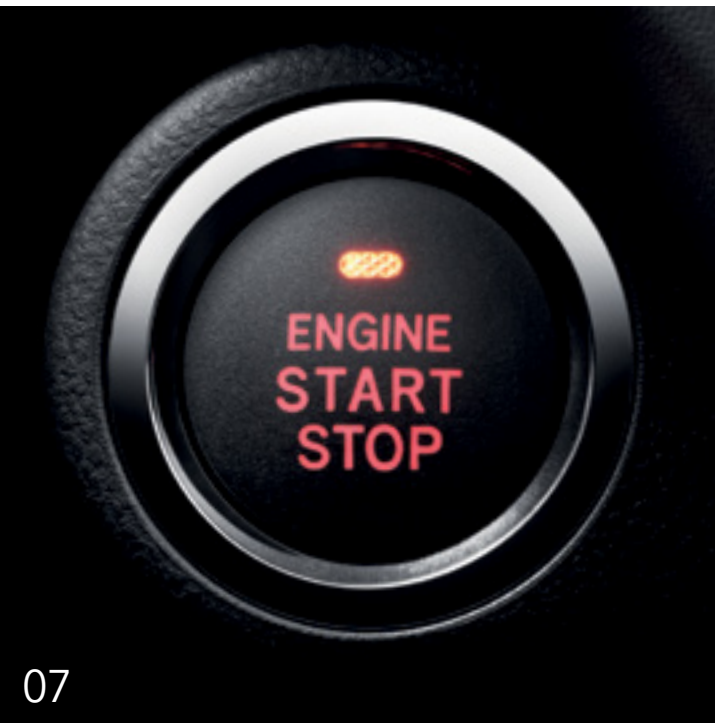

Find your ideal driving position with this 10-way power adjustable driver's seat which features lumbar support for added comfort.

10. HEATED SEATS

The front seats in the Crosstrek are heated, with two temperature settings.

11. ELECTRONIC PARKING BRAKE (EPB)

One touch effortlessly engages the electronic parking brake. On acceleration, the brake automatically releases.
