Gear selector/mode controller

The Honda CR-V e:HEV comes with a button-operated drive mode selector that allows you to extend the length of time in Electric Drive, maximise economy and performance in Hybrid Mode and improve throttle response in all three modes with Sport Mode.

The Honda CR-V e:HEV

The Honda CR-V e:HEV uses Honda i-MMD technology to provide a responsive, smooth and efficient driving experience, seamlessly delivering optimum power by automatically switching between three driving modes: Electric Drive, Hybrid Drive and Engine Drive.

Electric Drive is when the car is running silently on pure electricity and drawing its power from the battery via a drive motor; this mode will usually be used when accelerating from standstill or during low speed cruising. In Hybrid Drive, both the petrol engine and electric motors are sharing the work, for example when accelerating at speed. Engine Drive is when the petrol engine is powering the car – such as during sustained high-speed motoring.

As well as using the petrol engine to generate electricity, the i-MMD system harvests otherwise wasted energy to recharge the battery, meaning you'll never have to plug your CR-V e:HEV into the mains.

Honda SENSING: technology for safety

Adaptive Cruise Control

Maintains a set cruising speed and following distance relative to the vehicle in front. If the detected vehicle stops, the function will decelerate and stop your vehicle

Blind Spot Information

This clever device makes lane changes and overtaking safer, warning you when vehicles are detected in your blind spot by illuminating a light in your door mirror

Lane Keeping Assist System

Helps keep you in the middle of your lane, providing a less stressful driving experience by reducing the need for steering correction movements on the motorway

Collision Mitigation Braking

The system will alert you to the possibility of a collision with a vehicle, pedestrian or cyclist – even at night where there is no street lighting – and reduces your speed

Intelligent Speed Limiter

Combines the existing adjustable speed limiter function with Traffic Sign Recognition, to set the speed limit to that which Traffic Sign Recognition detects

Honda CR-V e:HEV: intelligent driving modes

The new CR-V e:HEV's intelligent Multi-Mode Drive system (i-MMD) combines with next generation e:HEV Hybrid drive technology to achieve effortless driving performance and efficiency.

It's been designed to offer a responsive and smooth drive in all circumstances with the reassuring benefits and versatility of electronically controlled All-Wheel Drive and e-CVT automatic transmission.

With 184PS from the petrol engine and a further 245PS from the electric motors, the new CR-V e:HEV delivers exceptional fuel economy of up to 42.8mpg on the WLTP combined cycle.

Underneath, the lightweight chassis is the most sophisticated ever created for the CR-V, with a new MacPherson strut front suspension and multi-link rear set-up providing an agile drive and luxurious levels of comfort.

-  **No need to plug in** The CR-V e:HEV is a self-charging hybrid, so there's no need to plug-in or plan a journey around charging stations – it generates power as you drive
-  **Low emissions** Advanced e:HEV Hybrid technology not only reduces emissions but also lowers the cost of driving by saving fuel
-  **Fuel-efficient** The CR-V e:HEV is an economical SUV – for example, the SE model can travel up to 534 miles before your next fuel stop
-  **Seamless drive modes** The CR-V e:HEV's intelligent driving modes shift automatically as you drive, maximising performance in different driving conditions

Electric drive delivers an instant and smooth response from a standing start by using the energy stored in the battery to power the electric motor

Hybrid drive uses electricity and petrol for everyday driving, as well as providing exhilarating acceleration

Engine drive uses petrol to maintain higher speeds on motorways

Regenerative braking uses the energy generated by the electric motor when braking to recharge the battery

CR-V e:HEV S

CR-V e:HEV S models come with impressive specification that includes climate control auto A/C, LED headlights with LED daytime running lights, LED front foglights and LED rear lights, body colour door mirrors with integrated LED indicator, dusk-sensing auto lights, Bluetooth™ hands free telephone integration and DAB radio with a 5" Monitor Audio.

Honda CR-V e:HEV S 5dr

Price (PI1D) ¹	£30,870
Engine/Power (PS)	2.0 i-MMD Hybrid/145
Electric motor power (PS)	184
Drive/Transmission	FWD e-CVT Auto
CO ₂ (g/km) ¹	151
WLTP combined mpg	42.8
BIK % (2021/22) ¹	34
BIK tax (2021/22) ²	£175 / £350
BIK tax (private fuel) ²	£139 / £279
Class 1A NIC ³	£1,448
Fuel cost ⁴	£8,481

CR-V e:HEV S Key Features

- 18" Alloy Wheels
- LED Headlights
- LED Daytime Running Lights
- LED Front Foglights
- LED Rear Lights Cluster
- Black Fabric Upholstery
- Climate Control Single Auto A/C
- Dusk Sensing Auto Lights
- Power Windows, Front and Rear
- Intelligent Adaptive Cruise Control
- Vehicle Stability Assist
- Forward Collision Warning
- Collision Mitigation Braking System
- 5" Monitor Audio/DAB Digital Radio
- Bluetooth™ Hands Free Telephone
- Front USB Port
- Tailgate Spoiler

¹Figures dependent on exact specification. ²Quoted monthly for 20%/40% tax payers in 2021/22. ³In 2021/22. ⁴Over 60,000 miles. Unleaded at 133.1p/litre. For a full emission statement, please refer to the final page

¹Figures dependent on exact specification. ²Quoted monthly for 20%/40% tax payers in 2021/22. ³In 2021/22. ⁴Over 60,000 miles. Unleaded at 133.1p/litre. For a full emission statement, please refer to the final page

CR-V e:HEV SE Key Features

(In addition to CR-V e:HEV S)

- 18" Alloy Wheels
- 2WD or AWD
- Dual Automatic Climate Control
- Leather Steering Wheel
- Rain Sensing Auto Wipers
- Auto-Dim Rear View Mirror
- Glovebox Light
- Parking Sensors (Front and Rear)
- Rear View Camera
- Exterior Mirror Tilt for Reverse
- Privacy Glass
- 2 x USB Ports (Front)
- Honda CONNECT with Garmin Navigation, 7" touchscreen, Apple CarPlay®/ Android Auto™, Internet Radio, Aha™ App Integration
- Premium Audio – 9 Speakers

While we have made every effort to ensure the information in this document is accurate, neither Honda (UK) nor the author can be held responsible for any actions or consequences arising from acting on, or refraining from, taking any action as a result of reading this. The fuel consumption you achieve under real life driving conditions, and CO₂ produced, will depend upon a number of factors including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Figures stated are based on a standardised test cycle and may not reflect real world driving, therefore they should be used for comparison purposes only. Customers should only compare vehicles tested to the same technical procedures. There is a new test for fuel consumption and CO₂ figures. You can find out more about the changes brought in by WLTP at <http://wltpfacts.eu/>.
