EV4

Movement that inspires

For your desire

The Kia EV4

Wherever your journey takes you, wherever you choose to linger—when the life you’ve dreamed of becomes your everyday reality, the Kia EV4 will be with you.

Long range _ Morning Haze / Specifications may vary according to the trim and options that are selected.

Exterior

With a sleeker Tiger Face, sculpted silhouette, and a distinctive dual roof spoiler, the Kia EV4 redefines the future of EV sedans.

Long range _ Snow White Pearl / Specifications may vary according to the trim and options that are selected.

Dynamic Welcome/Escort Lighting

Walk Away Lock

For your desire
The Kia EV4

From the moment you arrive until you step away,
the EV4 commands everyone's attention

Small Cube Projection LED Headlamps | Dual Roof Spoiler | Sculpted Wheel Arch Molding

Technology meets intelligence—for a driving experience
that grows more satisfying with every mile

Maximum range of 533 km | Intelligent Headlamps | Steering Wheel Grip Detection

Spacious and serene cabin—comfort that surrounds you

Interior Modes | Rotating Armrest | Sliding Console Table

Gray Interior (Misty Gray & Nougat Brown) / Specifications may vary according to the trim and options that are selected.

Interior

Modern and minimalistic interior design offers a spacious and elegant sense of space. Meticulous details emphasize a premium feel.

Furthermore, 10 different material solutions incorporated to the interior embody Kia's effort to deliver sustainable products and service with respect and responsibility towards nature.

10 Material Solutions

Interior Modes

The interior modes create the perfect setting for rest or watching movies. With the simple touch of a button, you can adjust the cabin temperature, display/indoor mood light brightness and seat angles for the ultimate in immersive and restful ride experience.

Kia App-Linked Vehicle Update/Kia Connect Store

When a new software update is available, the Kia App lets you remotely power up the vehicle and, with your approval, perform wireless software updates for up to date driving experience. After purchasing a car, customers can separately purchase and access new features offered by the Kia Connect Store for a limited period or permanently.
(Streaming Premium, Display themes and arcade games)

Specifications may vary according to the trim and options that are selected.

Convenience

Smart convenience features, effortlessly controlled with a touch, provide pure driving pleasure.

Panoramic Wide Display / Kia AI Assistant

Panoramic wide display offers convenience and luxury, and Kia AI Assistant enables smart vehicle usage experience.

KBO/NBA Display Themes

Show your team spirit at and beyond the stadium—customize your EV4's display with the logo and colors of your favorite team among 10 KBO / 30 NBA teams.
(Purchase a theme for each team via Kia Connect Store)

Relaxation Comfort Front Seats /
Dynamic Ambient Light

Relaxation seats for the driver and front passenger offer a weightless, zero gravity position for the ultimate in comfort. Ambient lighting creates a multidimensional display of patterns for an emotionally rich and immersive atmosphere.

Steering Wheel Grip Detection

The capacitive touch sensor on the steering wheel detects the driver's hands through electrical signals, ensuring better comfort and safety by confirming the driver is holding the wheel.

Head-Up Display

The head-up display projects essential driving information onto the windshield, reducing eye movement and enhancing safety.

Experience a smarter everyday life with the EV4, elevated by meticulous safety technologies that help prevent pedal misapplication and a comprehensive suite of convenience features.

Pedal Misapplication Safety Assist

When starting from a standstill with a front or rear obstacle (vehicle or wall) within 1.5 meters, if the driver mistakenly presses the accelerator instead of the brake, the system limits acceleration and automatically applies emergency braking to help reduce collision damage.

Acceleration Restriction Assist

While driving at speeds below 80 km/h, if the accelerator pedal is pressed deeply for an extended period, the system provides a warning and temporarily limits acceleration. Acceleration is restored when only the brake pedal is applied, or one second after the accelerator pedal has been fully released.

Interior V2L Outlet

By plugging into the outlet on the lower part of the rear seats, users can conveniently charge electronic devices using 220 V power.

100 W C-type USB port

A 100 W C-type USB port with significantly increased charging performance offers seamless compatibility with the latest devices and provides quick and convenient charging.

Smartphone Wireless Charging System (Dual)

Enables fast wireless charging for up to two smartphones simultaneously within the vehicle.

Large Trunk Capacity

New trunk features a simplified spring structure and optimized design to maximize storage space.

EV Experience

Long range _ Snow White Pearl / Specifications may vary according to the trim and options that are selected.

※ Battery charging times are based on internal laboratory tests.
※ Actual charging time may increase due to a decline in the battery's performance when outdoor temperatures drop, such as in the winter.
※ Charging times were measured when the battery and exterior were at room temperature. Actual figures may vary depending on the battery temperature, power of the charger, battery condition, and external temperature.

Exterior V2L Connector
The exterior V2L connector allows electronic devices to be used outside the vehicle, offering convenience in outdoor environments.

Max. range per charge	Battery	Max. power	Max. torque	Charging Time
533 km	81.4 kWh	150 kW	283 Nm	31 min
Based on Long-range 2WD, 17" alloy wheels				

Complies with all Criteria for the Battery Safety Certification Pilot Project by the MoLIT
The EV4 met the criteria for the Battery Safety Certification Pilot Project overseen by the Ministry of Land, Infrastructure and Transport.

Automatic Payment System for EV Charging (PnC)
Without authentication at E-pit charging stations, charging starts by plugging into the charging inlet port, with automatic payment when charging is complete.
*PnC : Plug & Charge

Battery Charge and Discharge Pattern Analysis
Battery capacity is analyzed, and the driving range, remaining battery level and charging type are controlled to support more efficient battery management.

i-PEDAL 3.0
At all stages of regenerative braking, the accelerator pedal can be used to adjust the car's speed or bring it to a stop. A memory function is available for reverse parking and restarting.
※ The reverse parking function can be switched on/off in the system settings menu.

Safety

Kia's advanced driver assistance systems ensure driver safety and convenience in a variety of driving and parking situations.

Highway Driving Assist 2(including Lane Change Assist)

Maintains a safe distance from the vehicle in front on motorways and highways, and maintains the speed set by the driver while keeping the car in the center of the lane, even on curved roads. It moves the vehicle to the other side of the lane if it gets too close to a vehicle in the next lane. When the turn signal is activated while you are holding the steering wheel and driving above a certain speed, the vehicle will automatically change lanes in the direction of the activated turn signal.

Intelligent Headlamp (IFS)

Ensures a clear view for the driver by using high beams and blocking light from oncoming vehicles to prevent glare. This functionality extends to preceding cars as well, ensuring a clear view for the driver without requiring a separate headlamp operation, making nighttime driving easier.

Remote Smart Parking Assist

The driver can move the vehicle forward or backward remotely from outside. It is also possible to enter or exit parking spaces with a smartphone as well as a smart key.

※ Without a smart key, the driver can also use Digital Key 2 of a smartphone (iPhone or Android smartphone).

Safe Exit Assist

A warning is generated if the system detects a risk of collision with an approaching vehicle when a passenger opens a door to exit. When the driver presses the electronic child lock button to assist a rear seat passenger in exiting the vehicle, if the system detects a risk of collision with an approaching vehicle, the Electronic Child Lock remains locked for passenger safety.

Driver Forward Attention Warning Camera*

The camera installed to the steering wheel comprehensively considers the direction of the driver's gaze and whether the driver's eyes are closed, and initiates a warning when the driver fails to maintain a forward gaze.

Forward Collision Avoidance Assist

By detecting the risk of collision with a vehicle, motorcyclist, pedestrian, or cyclist ahead, the system issues a warning and assists with braking to reduce or avoid an impact. At intersections, the system detects the risks of collision with oncoming vehicles when turning left or right, oncoming vehicles while driving or oncoming vehicles from the left or right when passing through the intersection, and assists with braking. When changing lanes, the system detects the risk of collision with oncoming vehicles from the opposite direction or vehicles in the next lane, or cars or pedestrians on the edge of the lane in front, and assists in changing direction.

Rear Parking Collision-Avoidance Assist

If there is a risk of collision with an object or pedestrian behind you while backing up, it activates a warning and automatically intervenes with braking assistance.

※ ADAS is only intended to assist the driver. Be attentive while driving at all times. / Functions may not operate smoothly due to road or driving conditions. / Please refer to the user's manual for details.

EV Charging Guide and Subsidies

EV Charging Guide

Check "Charging EVs and Benefits" on KIA EV Guide page

- How to charge EVs (Slow/Fast/Ultra-Fast)
- Charging status (Destination/On-route Charging)
- Charging cards (MOE/Private Business Operator)
- Installation of chargers

※ Scan QR Code > Connect to KIA EV Guide page

KIA EV Subsidies

Vehicle Models subject to Subsidy Payment [Government Subsidies]

Subsidy Payment Status [Local Government Subsidies]

※ Scan QR Code > Connect to Zero-Emission Vehicle Portal website
※ Local Government Subsidies: Available when clicking "Local Government Subsidies by Vehicle Models" under the "Browse Reference Years" section

Application Procedures for EV Subsidies

1. Contract on vehicle purchase

Customer → Branch/Agent

Visit branch and contract on vehicle purchase

2. Application for Subsidies

Branch/Agent → Local Government

Check remaining vehicles assigned for local government subsidies and vehicle delivery date
Fill in the documents required and submit to the local government
Check if you were selected as a recipient

3. Consult for Charging Solution

Customer ↔ Branch/Agent

Check the type of chargers and installation procedures
Give information on the desired chargers by customers

4. Vehicle Delivery

Branch/Agent → Local Government, Customer

10 days before the expected delivery date
Finally check if you can receive subsidies
Check the availability and deliver

5. Apply for Subsidies

Branch/Agent → Local Government

Apply for local government subsidies after delivery and registration
(Within 10 days after delivery)

※ Information above may vary depending on MOE/Local Government.
※ Visit Emission-Free Vehicle website for more information.

Kia Connect

Kia Connect is Kia's connected car service for wireless software updates, smartphone-based remote vehicle control, and emergency alerts for a safer and more convenient vehicle usage experience.

※ Enjoy 5 years of complimentary full-service upon initial enrollment with your vehicle purchase, followed by 5 additional years of essential services—including SOS emergency dispatch, automatic notification of airbag deployment, traffic information, and EV battery monitoring.
※ EV battery monitoring: It is the service offered to Kia Connect members who registered their vehicle in Kia App, notifying the customer of battery issues of their vehicle. ※ A link to a streaming service subscription is required to use Kia Connect's streaming service.
※ If your streaming service subscription only supports mobile devices, it will not be compatible with Kia Connect's streaming service. ※ The features/range of Kia Connect remote control may vary depending on your vehicle's trim and options.
